

PROCEEDINGS OF THE
INTERNATIONAL INFORMATION EXCHANGE MEETING

ON

Actinide and Fission Product
Separation and Transmutation

held at

Argonne National Laboratory
Argonne, Illinois
United States
11-13 November 1992

OECD NUCLEAR ENERGY AGENCY

1993

Opening Remarks

by

Y. Chang (United States)
G.H. Stevens (OCED/NEA)

Dr. Yoon Chang welcomed the participants on behalf of the Argonne National Laboratory. He also thanked Dr. Yuri Oreshwa for arranging the meeting.

Mr. Geoffrey Stevens welcomed the participants on behalf of the Nuclear Energy Agency and thanked the Laboratory for their invitation and for the excellent work in setting up the meeting. Recalling that this was the second general meeting of the Agency's International Information Exchange Programme on Actinide and Fission Product Separation and Transmutation, he noted that the subject was one of increasing interest in political circles. It remained, however, a programme aimed at assisting long-term research work. He had been glad to note the richness of contributions to specialist meetings that had been held at Karlsruhe, Mito City and Würenlingen since the first general meeting, and looked forward to a stimulating set of presentations, discussions and visits to the Argonne facilities.
